1.

Our company

LUKIC WOOD

The company "Lukic wood" has existed since 2017.

We used to work as a craft shop "D&D wood". As the needs of the business required, we grew into the company "Lukic wood".

We currently have

1750 m² of production space

1200 m² of warehouse space

240 m³ of dryer capacity

Our company is 100% export-oriented, focused on serial production of furniture and furniture parts.

Standard quality, meeting deadlines and serial production are what have marked us in the market. This is evidenced by long-term cooperation with customers from Denmark, England and Poland.

Our customers are suppliers of large department stores or furniture salon chains, such as JYSK or large furniture factories that incorporate our products into their own.

2. Our products

All our products are of excellent quality, meet high European standards. We work exclusively with solid wood. We make all our products in oak and beech.

In our range the following products have been available:

- Wooden legs of several types, shapes, dimensions
- Armchairs
- Bed boards
- Kitchen boards
- Rollings pins

WOODEN LEGS

We produce hardwood legs such as oak and beech.

So far, we have exported over 2,000,000 pieces of various sizes, shapes and purposes, surface treated or not.

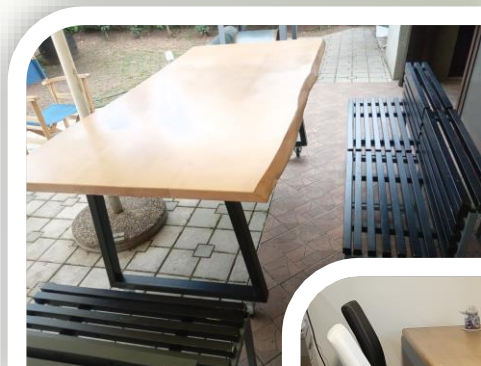

We have the ability to make large series.

ETHNO TABLES

„Ethno is always in fashion “

We are proud to present tables in ethno style, quality, massive, very decorative, made of solid wood and wrought iron that ennoble any space and bring warmth to your home.

ARMCHAIRS

At the customer's request, we put the armchair production line into operation.

Quality of raw materials and quality system guarantee the fulfillment of customer requirements.

CHAIRS

Another finished product of high quality workmanship, dimensions and design according to the customer's wish. Production could be made of large series.

ROLLING PINS

„Rolling pin is an indispensable weapon of every housewife.“

Our wooden rollers with a rotating roller are very practical. The rotating roller and the ergonomic shape of the handles make it easier to stretch the dough.

KITCHEN BOARDS

Boards for cutting and serving are of pure wood, treated with vegetable oils, which have certificates that do not harm health and are suitable for contact with food. Shape and dimensions meet the customer's wishes.

PELLET

Pellet is an innovative, high-calorie, environmentally friendly biofuel obtained from chopped wood, exclusively by pressing, without the addition of any binders.

For our pellets we use hardwood, oak and beech, with the addition of conifers in the amount of 10-15%. In this way, high quality pellets were obtained, which developed a high calorific value.
